TRUE DATA FREEDOM

With the Spring semester quickly flying by, let's take a moment to learn how our community members at universities and schools around the world utilize TrueNAS to support their research. You can also view these resources on the TrueNAS Education page.

1. Ensure Data Redundancy

As Ben Franklin Charter School's data grew, they needed to easily access the data across all five campuses while still having the resiliency of backups for disaster recovery. Now, with a TrueNAS solution that provides unified storage and redundancy, they're set for success.

2. Prevent Data Corruption

With the TrueNAS OpenZFS filesystem, Cambridge University has snapshots to prevent accidental data deletion and ensure version control. Learn how Cambridge University keeps its research records intact and readily accessible.

3. Simplify Data Management

Throughout the whole process of getting TrueNAS up and running, and even after, McGill University knew that they could count on the TrueNAS support team for help along the way.

Modernizing Education

Have up to 99.999% uptime and easily share mission-critical information across sites with the legendary TrueNAS OpenZFS filesystem. You can learn more about using TrueNAS in education below.

Power Your Institution on TrueNAS

"iXsystems' support has been incredible. And given our commitment and in the context of how important the data is to our researchers, it has to be."

- Ron Simpson,
Operations Supervisor, McGill University
